

## ONE SEAL

### Features

- SCEC Approved.
- ISO 17712 and C-TPAT compliant.
- The flexible patented design provides a high degree of flexibility to fit on any container, truck, or trailer door hasp.
- 20 bolts per tape and 20 locking heads per tape

### Material

The core of the seal is made of metal and cast into a shock proof plastic material which cannot burn.

Dimensions

### Unit

- 8.5mm diameter shaft.
- 20mm diameter head.

### Carton (200 Units)

Size: 385mm x 205mm x 105mm

Weight: 18.35kg

### Strength Characteristics

A close test has been performed to guarantee a high and uniform tensile strength of a minimum 2500lbs and if you expose the seal to a tensile force larger than 2500lbs the pin will break before the actual locking mechanism.

### ONE SEAL FLEXIBLE BARRIER SEAL (NUMBERED)

ON00008	Green
ON00010	Orange
ON00013	White
ON00014	Yellow

## ONE SEAL

## The only real Anti-Spin High Security Seal

### High Security Container seal - with flexible pin and ANTI-SPIN feature

The patented flexible design provides a high degree of flexibility to fit on any container, truck or trailer door hasp. The patented anti-spin feature ensures that the pin with its 4 “fins” as part of the locking mechanism prevents friction attacks. The stock Yellow, Green and Blue, One Seal models now includes the anti-spin feature.

### The Pin

ONESEAL flexible type 79-T06 pin is made of metal. The pin of the seal has a Ø 5 mm soft wire embedded - making it flexible and resistible to any harsh tool. The pin is coated with plastic and marked with an “H” indicating High Security Seal. Standard colours are red, white, blue, green and yellow.
